## **This Month's Presentation:**

**Dr David Pearson & Warren Schlote**

### **Sudbury: Of Rocks, Trees & Astronauts**

Geologist and Founder of Science North, Dr. David Pearson, joins Historian and Videographer Warren Schlote in exploring the surprising chain of events flowing from an ancient Asteroid Impact. They will discuss the role of Sudbury in training past and future lunar astronauts, and how the re-greening of Sudbury became an internationally-reknown case study for environmental recovery.

**- == Join us! == -**

**Tuesday June 11th @ 7PM**

**A Hybrid Meeting on Zoom and at the Doran Planetarium**

## Speaker Biographies

### Dr. David Pearson

Dr. David Pearson is a Professor Emeritus in the School of Natural Sciences at Laurentian University. He studies how changing climate will affect the communities, landscape and wildlife of Ontario between the Great Lakes and Hudson Bay. He began working with First Nations in the north in 2009 and is now very pleased to be leading the project described on the [Up North on Climate Website], visiting communities with a small team of scientists, speaking with chiefs, councillors, community members, and young people in school classes.

David was a member of the Geology Department at Laurentian for many years, teaching geology courses followed by some years as the co-director of the Science Communication program. Between 1980 and 1986 he was on leave from the university as the first Director of Science North, the public science centre in Sudbury. Ever since then he has been a strong supporter of engaging young people with hands-on science activities.

---

### Warren Schlote

Warren is a CBC Radio personality and can be heard on CBC Radio's Morning North often during the weather report. In addition to this, Warren is a Youtube personality, having created a series there called 'Living History'. This series can now also be seen as part of The Agenda with Steve Paiken on TVO.
